#### INTRODUCTION

For many years North Wales Fire and Rescue Authority has been publishing annual Improvement and Risk Reduction Plans in accordance with legislation and statutory guidance. Following the introduction of new legislation<sup>1</sup>, we are publishing our second Improvement and Well-being Plan.

Rather than focus exclusively on planning the next few years for our own organisation, the new Well-being of Future Generations (Wales) Act 2015 requires the Authority to set its sights further into the future and to consider what it can do now to start improving the lives of people who will be living in North Wales in the 2020s, 2030s and 2040s. This is an opportunity for public services to think in the longer term and to work together more effectively to tackle the complex issues that affect people's lives but cannot be resolved by just one organisation through short term plans.

The Plan content has changed, but the statutory deadline for publishing<sup>2</sup> remains the same, as does the overall intention behind publishing which is to explain publicly what the Authority's intentions are, to invite comments and suggestions, and to provide a basis for our October progress reports.

The Sustainable Development Principle: acting "in a manner which seeks to ensure that the needs of the present are met without compromising the ability of future generations to meet their own needs".

<sup>&</sup>lt;sup>1</sup> The Wellbeing of Future Generations (Wales) Act 2015.

<sup>&</sup>lt;sup>2</sup> Fire and Rescue Authorities (Improvement Plans) (Wales) Order 2012 and paragraph 10 of Statutory Guidance "Shared Purpose Shared Future" (SPSF2).

#### APPLICABLE LEGISLATION

#### The Local Government Measure 2009

Since 2009 North Wales Fire and Rescue Authority has been subject to the Local Government Measure 2009 that requires it to set and publish improvement objectives. As a designated "Welsh Improvement Authority" under this legislation, North Wales Fire and Rescue Authority's improvement plans must demonstrate that it has improved what it does in terms of at least one out of seven aspects of improvement, which are:

- 1. strategic effectiveness;
- 2. service quality;
- 3. service availability;
- 4. fairness;
- 5. sustainability;
- 6. efficiency; and
- 7. innovation.

Objectives do not have to change from year to year, or be achievable within a single year.

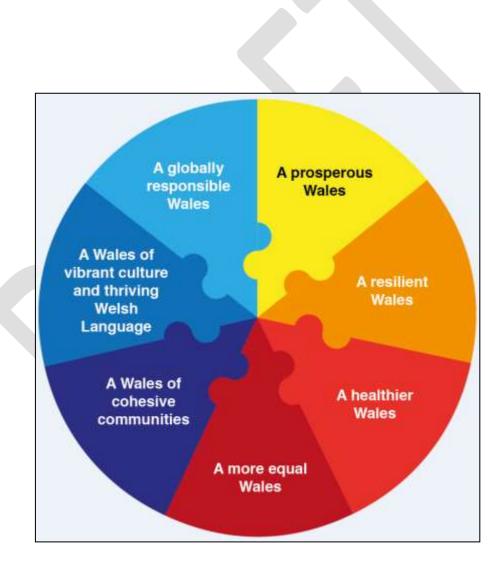

#### The Well-being of Future Generations (Wales) Act 2015

The aim of this new Act is to improve the social, economic, environmental and cultural well-being of future generations of people in Wales. North Wales Fire and Rescue Authority, as one of the public bodies listed in the Act, must carry out "sustainable development"<sup>3</sup> in order to help bring about that improvement in the Welsh population for the future.

<sup>&</sup>lt;sup>3</sup> Sustainable development is the process of improving the economic, social, environmental and cultural wellbeing of Wales by taking action, in accordance with the sustainable development principle, aimed at achieving the well-being goals. The sustainable development principle means acting "in a manner which seeks to ensure that the needs of the present are met without compromising the ability of future generations to meet their own needs.

#### WALES'S WELL-BEING GOALS

The Act lists seven well-being goals for Wales as a whole. These goals are intended to promote a sense of common purpose, and so encourage people and organisations to work together to help achieve the goals for the benefit of future generations of people. The goals are described in more detail in appendix A towards the back of this Plan.

#### WHAT THE WFG ACT REQUIRES NORTH WALES FIRE AND RESCUE TO DO

The Well-being of Future Generations Act requires North Wales Fire and Rescue Authority to set and publish well-being objectives. These long-term objectives are changes that the Authority wants to help bring about in North Wales that will contribute to improving local well-being and to moving Wales closer to achieving its well-being goals. Having identified these long-term objectives, the Authority has a duty to take all reasonable steps to pursue them and to report publicly after the end of each financial year on the progress it has made.

The Act also requires North Wales Fire and Rescue Authority to engage as an active member of Public Services Boards (PSBs). These statutory boards bring relevant organisations together to plan and work jointly on improving the social, cultural, economic and environmental prospects of future generations of people in their area. North Wales Fire and Rescue Authority is a member of all four PSBs in North Wales - Wrexham; Flintshire; Conwy and Denbighshire; and Anglesey and Gwynedd.

### The well-being duty

Every public body subject to the Well-being of Future Generations Act must carry out sustainable development, and in so doing, must set and publish wellbeing objectives that are designed to maximise its contribution to achieving each of the national well-being goals, and take all reasonable steps to meet those objectives in accordance with the Sustainable Development Principle and the five ways of working

In summary North Wales Fire and Rescue Authority must:

- Set and publish well-being objectives;
- Take all reasonable steps to meet those objectives;
- Publish a statement about its well-being objectives;
- Publish an annual report of progress;
- Publish a response to any recommendations made by the Future Generations Commissioner for Wales.

#### HOW NORTH WALES FIRE AND RESCUE AUTHORITY MUST ACT

The Well-being of Future Generations Act requires North Wales Fire and Rescue Authority to focus on trying to make sure that the things it does now don't have a negative impact on the lives of the people who will be living here in years to come<sup>4</sup>.

The Authority must adopt particular ways of thinking and operating to help retain that focus on protecting the well-being of future generations of people.

The "**five ways of working**" defined in the Act involve:

- Looking to the **long term** so that what happens now does not compromise the ability of future generations to meet their own needs.
  - - **Preventing** problems from occurring or from getting worse.
- Taking an **integrated approach**, considering how its own wellbeing objectives might impact on each other and on the achievement of the well-being goals for Wales.
- Remembering the rich diversity of people in North Wales and encouraging them to **get involved** in the decisions that affect them.
- Working **collaboratively** with others to help the Authority achieve its objectives, and, conversely, to help others to achieve theirs.

<sup>&</sup>lt;sup>4</sup> According to the Act, a public body "must act in a manner which seeks to ensure that the needs of the present are met without compromising the ability of future generations to meet their own needs". This is called the "sustainable development principle".

## WELL-BEING STATEMENT

## NWFRA's long-term well-being objectives are:

- A. To support people to prevent accidental dwelling fires and stay safe if they do occur;
- B. To facilitate high quality, responsive and better integrated fire and rescue services so that prevention activity and emergency response can continue to be available when and where required, affordably, equitably and on the basis of risk.

To meet the well-being objectives in accordance with the sustainable development principle<sup>4</sup>, NWFRA proposes to take steps to:

- 1. Deliver a comprehensive programme of prevention activity aimed at helping to keep people and communities safe from accidental fires in living accommodation;
- 2. Secure the Authority's financial sustainability by adopting a 3-year financial strategy that combines the use of reserves, increasing financial contributions and making service reductions;
- **3.** Continue to explore opportunities to work with other organisations to offer a wider range of integrated services to the public of North Wales.

# NWFRA has set its well-being objectives in accordance with the sustainable development principle in that:

- It has considered the long term challenges facing North Wales which includes projected demographic changes of an ageing and growing population, and anticipated financial constraints affecting public services.
- It has retained prevention at its heart, recognising that preventing fires and other harmful situations from arising makes better sense than response alone.
- It has taken an integrated approach and considered other organisations' strategies (e.g. for community health services) as well as its own.
- It has continued to build productive working relationships with a range of other organisations, planning and collaborating at different levels and through various forums, including the PSBs.
- It has consulted widely and sought the views of the general public and representatives of particular groups whilst determining its objectives.

North Wales Fire and Rescue Authority will be monitoring its progress towards meeting its well-being objectives through the Service's day to day management arrangements and regular reports to the Authority.

## NWFRA will involve other people with an interest in achieving the goals and ensure that those people reflect the diversity of North Wales.

The Service engages daily with a broad diversity of people who would have an interest in the achievement of Wales's well-being goals.

Through referrals from partner organisations the Service meets people whose circumstances make them more vulnerable to fires. Through particular prevention activities (e.g. safe and well checks, arson reduction actions and schools visits), courses (e.g. Phoenix) and professional networks and meetings, the Service holds regular conversations with people whose views and experiences help shape the services that are delivered.

The Service also engages regularly with the business community during audits of non-domestic premises – e.g. people running small family businesses, employers of large workforces, hoteliers, restaurant owners, hospital managers and teachers.

Information about the response to the Authority's 2017 public consultation is available on request or from the Authority's website<sup>5</sup>.

<sup>5</sup> http://www.nwales-fireservice.org.uk/fire-and-rescue-authority/meetings-agendas-and-reports/2017/10/23/231017-ep/

By meeting its well-being objectives NWFRA will contribute to achieving the well-being goals for Wales by making Wales:

• **prosperous** because of the reduction in the direct and indirect financial impact of fires. Local areas will be better able to thrive economically and attract inward investment and public service resources will stretch further and achieve more than would otherwise have been affordable;

• **resilient** because of the continuing availability of well-planned and sustainably affordable public services, but more importantly because people and communities will increasingly have the knowledge and confidence to develop their own resilience;

• **healthier** because fewer people will fall victim to avoidable harms; the environment will be cleaner and natural resources and landscapes will be protected for outdoor activities;

• **more equal** because attention will be targeted at supporting and influencing those people whose health, personal characteristics and/or lifestyle at different points in their lives place them at increased risk;

• a country of **cohesive communities** because safe, resilient and confident communities are more likely to maintain a sense of common purpose, sharing services and their resources more equitably;

• a country of **vibrant culture and thriving Welsh language** because prosperous, resilient communities are better placed to develop a constructive and affirmative culture and engage in a diversity of cultural pursuits, and also because the Authority's established commitment to the Welsh language means that anyone who comes into contact with the Service is able to do so in their choice of either Welsh or English;

• a **globally responsible** country because of the element of environmental protection associated with the prevention of dwelling fires, and also because of the commitment to sustainability through responsible stewardship of the Authority's financial resources.

**Improvement and Well-being Objective A:** To support people to prevent accidental dwelling fires and stay safe if they do occur.

How this objective contributes to national well-being goals and the well-being of the population of North Wales.

I

Well-being goals	Aspects of well-being	8	0	9	5	•	Explanation

## Rationale

The place where people are most likely to be killed or injured by fire is in the home, and this is despite being familiar with the layout of the building and usually being close to at least one escape route.

Our analyses of previous fire casualties identified a range of factors that can place people at increased risk from accidental fires in the home. These factors include:

- their age (young children and older adults);
- having a disability or a limiting medical condition;
- being alone at the time of the fire;
- being affected by alcohol and/or drugs;
- living in rented accommodation;
- having no working smoke alarm installed at the premises;
- having a previous history of careless disposal of lighted material;
- living in social deprivation.

The more contributory factors that relate to a person, the higher their risk of falling victim to a dwelling fire.

The future demographic profile of North Wales indicates an ageing population. According to published projections for the area, over the next twenty years, there will be a large increase in the number of people aged 75 or over and thousands more people living alone. The Authority believes that being able to influence people's behaviours, to equip them with the knowledge and resolve to keep themselves safe and well for longer and to counteract the effects of the contributory factors makes very good sense.

## Step towards meeting the well-being objective

The step that North Wales Fire and Rescue Authority proposes to take towards meeting objective A is to deliver a comprehensive programme of prevention activity aimed at helping to keep people and communities safe from accidental fires in living accommodation.

## Actions towards meeting the well-being objective

During 2018/19, North Wales Fire and Rescue Authority will:

- Expand the scope of existing Home Safety Checks to include additional safety messages whilst maintaining quality of delivery and rename as Safe and Well Checks.
- Deliver 20,000 Safe and Well Checks, with at least 25% of those being delivered to households referred to the Service by another agency.
- Continue to develop a Fire Safety Strategy that incorporates sound evaluation methods to determine the impact and effectiveness of current safety messages and campaigns.
- Through analysis of past occurrence patterns, identify and seek to reduce the anticipated incidence of specific categories of fires.
- Further develop knowledge and understanding of factors that contribute to a person's vulnerability to dwelling fires and utilise this to provide welltimed, targeted messaging to build awareness of risks and consequences and try to influence and change behaviours.
- Continue to work with partner organisations and build new partnerships where appropriate.
- Maintain the currency of existing information-sharing agreements, and seek to establish new agreements where appropriate.

**Improvement and Well-being Objective B:** To facilitate high quality, responsive and better integrated fire and rescue services so that prevention activity and emergency response continue to be available when and where required, affordably, equitably and on the basis of risk.

## Rationale

Given the backdrop of financial uncertainty<sup>6</sup> and the potential increase in demand for services across the public sector, it is inevitable that the Authority will be faced with challenges to being able to sustain its services over the coming decades.

While living longer is to be welcomed, the projected ageing population can result in there being fewer people of working age to support those of pension age. Figures for the UK produced by the Office for National Statistics (ONS) show<sup>7</sup> that the number of people of a pensionable age will rise from an estimated 308 for every 1,000 people of a working age in 2016 to 365 for every 1,000 people of a working age in 2037.

The ONS also observes that "while a larger population increases the size and productive capacity of the workforce, it also increases pressure and demand for services such as education, healthcare and housing".

Age distribution of the UK population, 1975 to 2045 (projected)						
Year	<b>UK Population</b>	0 to 15 years (%)	16 to 64 years (%)	65 years and over (%)		
1975	56,226,000	24.9	61.0	14.1		
1985	56,554,000	20.7	64.1	15.2		
1995	58,025,000	20.7	63.4	15.8		
2005	60,413,000	19.3	64.7	15.9		
2015	65,110,000	18.8	63.3	17.8		
2025	69,444,000	18.9	60.9	20.2		
2035	73,044,000	18.1	58.3	23.6		
2045	76,055,000	17.7	57.8	24.6		

Age distribution of the UK population, 1975 to 2045 (projected)

Source: Office for National Statistics.

The pressure on fire and rescue services is therefore likely to come from several different directions including being able to recruit and retain sufficient operational firefighters who meet the requisite fitness standards, and securing sufficient funds to pay for delivering fire and rescue services at a time of increasing demand for a range of public services.

## Steps towards meeting the well-being objective

The steps that North Wales Fire and Rescue Authority proposes to take towards meeting objective B are to:

- 1. Secure the Authority's financial sustainability by maintaining the 3-year principal strategy that combines the use of reserves, increasing financial contributions and making service reductions;
- 2. Continue to explore opportunities to work with other organisations to offer a wider range of integrated services to the public of North Wales.

## Actions towards meeting the well-being objective

To work towards achieving long-term objective B during 2018/19, North Wales Fire and Rescue Authority will:

 Deliver services within the agreed budget of £33,492,877, underpinned by £646,701 from reserves along with a saving of £366,000 achieved due to a policy change relating to minimum revenue provision.

In 2017/18, the previous Fire and Rescue Authority (FRA) agreed to increase the financial contributions from the constituent Authorities by £1.28 million an increase of 4%. This was the first significant increase since 2010, however this was less than was required to meet increasing pay, price and capital funding costs. It was therefore necessary to underpin the 2017-18 budget with an additional £414,000 from reserves. The financial contributions are explained in more detail in appendix B towards the back of this Plan.

For 2018/19 the FRA were again provided with information which offered a 'mixed strategy' which included increasing the contributions from constituent authorities and underpinning from General Reserves. An increase in local authority contributions of 1% was agreed by the FRA in its December 2017 meeting. There may, however, be unanticipated cost pressures that will need to be met through careful management of the Authority's budget.

This means that there will be even greater financial challenges facing the Authority in 2019/20. The substantial savings that will need to be sought in 2019/20 will be the focus of future FRA discussions in early 2018.

#### Actions towards meeting the well-being objective continued.

- Consult publicly on proposed steps to be taken towards achieving the well-being objectives during 2019/20 and agree the budget for that year based on known and anticipated costs.
- Remain open to opportunities<sup>8</sup> for multi-skilled staff to work beyond organisational boundaries to offer a wider range of services, particularly those that will improve health, safety and wellbeing outcomes as part of a person-centred 'safe and well' approach.
- Continue to monitor and evaluate the impact and effectiveness of pilot programmes undertaken in partnership with other organisations.

<sup>&</sup>lt;sup>8</sup> North Wales Fire and Rescue Service has already worked with the Welsh Ambulance Services NHS Trust, responding to life-threatening medical incidents (co-responding) and to vulnerable people who have experienced a fall in their home (Community Assistance Team); and also with North Wales Police when people (particularly vulnerable people) have been reported as missing from home.

Α	ppendix A	The Well-being Goals for Wales
1.	A prosperous Wales:	An innovative and low carbon society which recognises the limits of the global environment and therefore uses resources efficiently and proportionately (including acting on climate change); and which develops a skilled and well-educated population in an economy which generates wealth and provides employment opportunities, allowing people to take advantage of a wealth generated through securing decent work.
2.	A resilient Wales:	A nation which maintains and enhances a biodiverse natural environment with healthy functioning ecosystems that support social, economic and ecological resilience and the capacity to adapt to change (for example climate change).
3.	A healthier Wales:	A society in which people's physical and mental wellbeing is maximised and in which choices and behaviours that benefit future health are understood
4.	A more equal Wales:	A society that enables people to fulfil their potential no matter what their background or circumstances (including their socio economic background and circumstances).
5.	A Wales of cohesive communities:	Attractive, viable, safe and well-connected communities.
6.	A Wales of vibrant culture and thriving Welsh language:	A society that promotes and protects culture, heritage and the Welsh language, and which encourages people to participate in the arts, and sports and recreation.
7.	A globally responsible Wales:	A nation which, when doing anything to improve the economic, social, environmental and cultural wellbeing of Wales, takes account of whether doing such a thing may make a positive contribution to global wellbeing.

#### HOW TO CONTRIBUTE TO FUTURE IMPROVEMENT OBJECTIVES

The Authority conducts a public consultation each year when it publicises its proposed objectives for the following year and invites comments from anyone with an interest in what the Authority does. All comments received are taken into account before finalising the following year's plans.

Anyone wishing to contribute new ideas about future improvement objectives are welcome to write to the Chief Fire Officer at the address shown above.
